Iberian scripts/graffiti in Iruña-Veleia

by Antonio Arnaiz-Villena & Diego Rey . July 19th 2011

Population Genetics and Linguistics, Dpt. Immunology, The Madrid Regional Blood Center, University Complutense,

Madrid, Spain. Email: aarnaiz@med.ucm.es.

Key words: Iruña-Veleia, Teverga (Asturias), Iberian, Tartessian, epigraphy, scripts, graffiti, "iberico", "grafitos", "escritura".

Summary

760 officially recognized scripts on ceramics from Iruña-Veleia excavated by Lurmen (approximately between years 2002-2008) have been analyzed. A number of these ceramics contains scripts which may be assimilated to Iberian writings. This number may be underestimated since more studies need to be done in already available and new found ceramics.

This is the second time that Iberian writing is found by us in a unexpected location together with the Iberian-Guanche inscriptions of Lanzarote and Fuerteventura. On the other hand, naviform scripting, usually associated to Iberian rock or stone engraving may have also been found in Veleia. Strict separation, other than in time and space stratification, between Iberian and Tartessian culture and script is doubted.
